DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-2, drawn to in vitro methods of using hemoproteins in reducing oxygen levels in aqueous solutions.

Group II, claims 3-4, drawn to in vitro methods of reducing NO in aqueous solutions using flavohemoglobin.

Group III, claim(s) 5-9, 13-34, 44-45 and 55-57, drawn to in vivo methods of reducing oxygen concentrations in a mammal utilizing hemoproteins.

Group IV, claims 10-12 and 42-43, methods of reducing NO concentrations in mammals using flavohemoglobin.

Group V, claims 35-41, drawn to compositions of hemoproteins.

Group VI, claims 46-49, drawn to compositions comprising flavohemoglobin.

Group VII, claims 50-54, drawn to methods of treating inflammation, stroke, septic shock, arthritis, iritis, ulcerative colitis, acute respiratory distress syndrome and heart failure.

2. The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: hemoproteins (hemoglobin, myoglobin and flavohemoglobin) appears to be the special technical feature that links the inventions of Groups I-VII, however, these compounds are well known in the art, and Groups II and IV require a NO reducing compound such as flavohemoglobin but does not require the deoxygenating compounds of other hemoproteins. Thus, there is no special technical feature that links the Groups in such a way as to provide unity of invention.
